

UW Bees, Beekeeping, & Pollination

ESRM 491D

School of Environmental & Forest Sciences

Full Summer Term (A+B)

T/Th 8:30-11:20

info: easugden@uw.edu

Students will learn:

- Biology of honey bees and other bee species
- Practical pollination
- Basic modern beekeeping skills
- Queen rearing skills
- How to conduct scientific research with bees

Experiences will include:

- Hands-on bee handling
- Swarm collecting
- Honey extracting
- Interfacing with professional beekeepers and bee scientists
- Bee-related artwork
- & more...

**LIMITED ENROLLMENT!
OPEN THROUGH JUNE 7TH!**

If you are interested in food production, farming, holistic gardening, botany, entomology, pollination, or are just curious about bees, this course will teach you all you imagined knowing and more. Your participation will be part internship and part science project, so be prepared to don your suit, grab your notebook, and have fun. Who knows - you may become a beekeeper!
