

FOREVER KANE

Understanding how Kane Hall consumes to help envision a path toward long-term sustainability

Since its construction in 1971, Kane hall has been the site of events ranging from freshman orientation and departmental graduation ceremonies to speeches by visiting dignitaries and renown scholars along with countless lectures on cell division, world history and everything in between. This display shows the resources Kane hall draws upon while supporting those activities along with some of the features that help to minimize its impact.

WHO PLAYS A ROLE IN MAKING KANE HALL EFFICIENT?

funded through a Green Up partnership between: Seattle City Light & UW Sustainability

HOW DOES KANE HALL CONSUME?
